More Information

I consider myself a hardworking individual who enjoys learning as much as living. "Knowledge takes no place" is one of my mottos. Throughout my short life, I had the opportunity to interact with multiple people from all sorts of backgrounds and that made me improve my communication and social skills, as well as being able to adapt to different situations.

I am passionate about **Linguistics** and I wish to pursue a career in that scientific field. My research interests are **Phonetics, Phonology, Language Acquisition and Development, Forensic Linguistics, Psycholinguistics** and **Neurosciences**.
